

Theatre Consultants Collaborative

Aga Khan Museum Toronto, Ontario

The new Aga Khan Museum is a showcase for Islamic art and artifacts as well as a cultural and educational center devoted to the study and practice of human pluralism. The crown jewel of the Museum is its stunning 350-seat recital hall – its interior dome inspired by Islamic geometries. Teak latticework

panels pay homage to the ancestral art of the *mashrabiya* while concealing adjustable acoustic draperies. Priority was given to a design that is appropriate for acoustic music with secondary uses for amplified music, lectures and film presentations.

SERVICES

Programming, theatre planning, auditorium design, and theatre equipment design and specification, i.e. performance lighting, rigging, and acoustical drapery systems
