

Theatre Consultants Collaborative

Loyola University: Mundelein Center Renovation Chicago, Illinois

In 2007, TCC submitted the winning competition proposal to design the first four floors of the historic Mundelein building. The study involved an in-depth examination of the functional space needs of the music, theatre and fine arts programs and the development of a detailed conceptual design that illustrated how they could best be accommodated

SERVICES

Theatre planning, auditorium design, and theatre equipment design and specification, i.e. performance lighting, rigging, adjustable acoustic devices, drapery, seating, and sound, video, and communications systems

within the landmark Art Deco building. The newly renovated building houses a new 250-seat thrust theatre, an ensemble rehearsal room, a multi-purpose glass roof-top space, a performance classroom, an experimental drama lab, music rooms, and scene and costume shops.
